NPIC Project N-528/64 (partial answer to C-RR4-81,355)

The Elektrostal Complex is located approximately 35 nm east of Moscow on a branch of the Noginsk-Fryazevo rail line. The complex occupies an area of 5 sq mi and contains three separate industries: the Noginsk Steel Plant, the Uranium Metals Plant, Factory 12, and the Elektrostal Heavy Machine Building Plant.

The Uranium Metals Plant is situated east of the railroad and appears to have no direct rail connection with either the Noginsk Steel

Plant or the Heavy Machine Building Plant. The Steel Plant and the Machine Plant appear to share road and rail facilities. (Rail lines are shown schematically in Figure 1.) The Uranium Metals Plant is surrounded by a cleared strip with a fence in the center. This plant is more heavily secured than is normal for an industrial facility. The other two plants have normal industrial security of fences and gatehouses.

No evidence of association with the missile program has been observed.
